

# S2 Maintenance

Hub Not Shifting

(Assuming fixing washer has come loose)

Step 1:  
Remove LH Nut  
And Cone

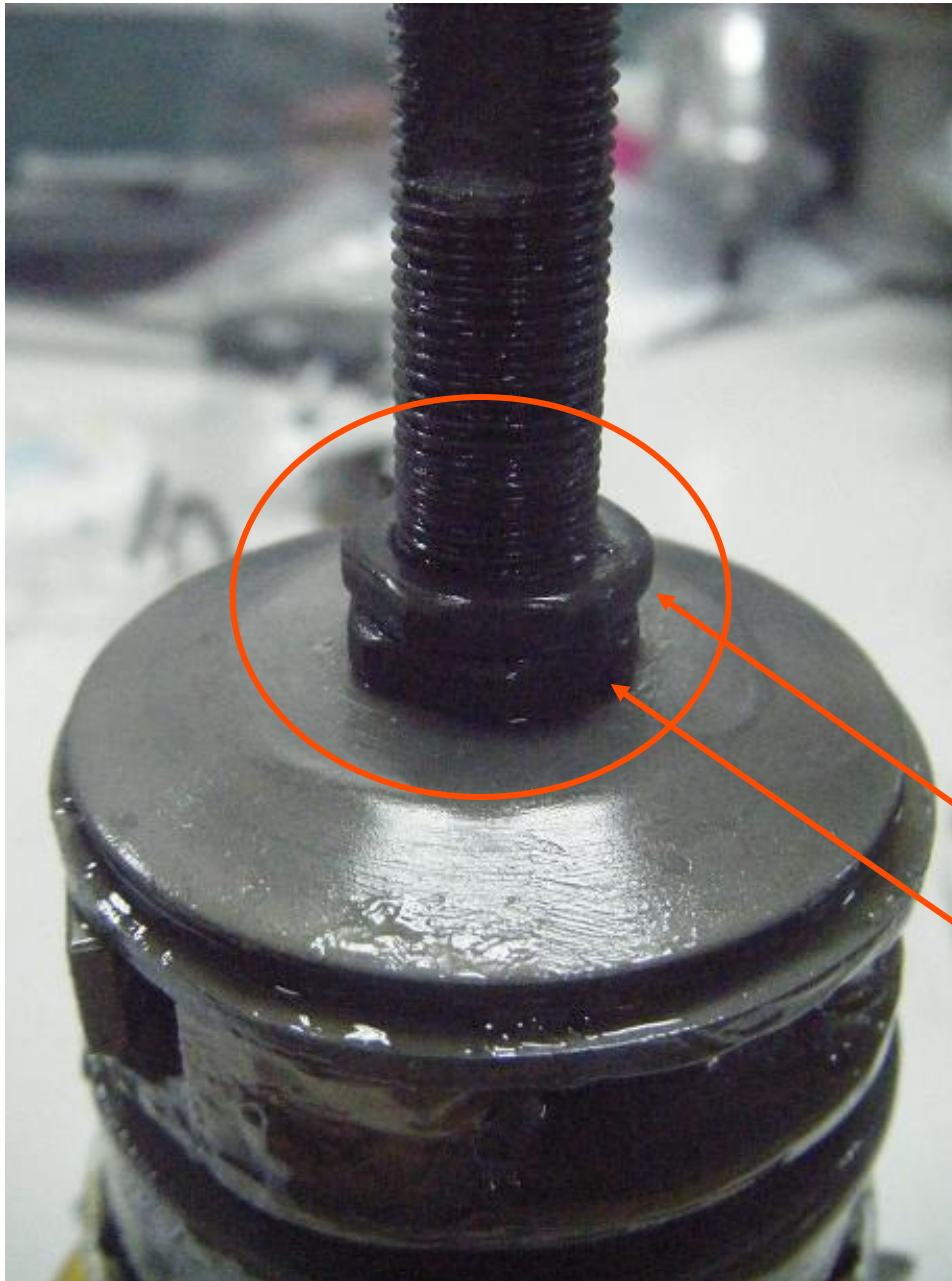

Step 2:  
Remove Internal. No  
proprietary tool is  
needed. Use a  
hammer and punch,  
hook spanner, or  
adjustable spanner to  
drift internal out. Left  
for loose.

Step 3:  
Hold Axle  
securely, check if  
Convex Fix  
Washer is loose.

Step 4:  
Tighten Nut 1  
and Nut 2.

Replace internal  
and hub cones.  
Adjust hub cones.

Nut 2

Nut 1
